Net**FORUM**®

Dedicated teams

Fully-dedicated NetForum consulting for your organization.

Are you looking for a flexible, cost-effective solution to your growing project backlog and the day-to-day management of your system? Do you have trouble hiring, training and retaining NetForum Enterprise development expertise at your organization?

Try NetForum Enterprise Dedicated Teams!

NetForum Enterprise Dedicated Teams is a new service in which India-based expert NetForum developers are dedicated to your organization, full-time, to work on tasks as you assign them, enabling you to knock out your backlog of IT projects, manage your day-to-day, and get the most out of NetForum Enterprise!

Cost-effective expertise

With a Dedicated Team, you will be adding top-notch NetForum developers to your staff, but you don't have to worry about hiring, training, or overhead costs. For a fixed monthly fee, you get the expertise and results - we worry about the rest.

Scalability to fit your needs

Need an extra set of hands to help during your busy season? Dedicated Teams provide you with the flexibility to scale your development resources based on the changing demands of your business. Add, reduce, or suspend your team size – with pricing and resourcing options tailored to your unique needs, you can have the help you need when you need it for a fraction of the cost of hiring or traditional IT consulting.

*Six-month minimum commitment required. US team may be extended beyond the first month for an additional fixed fee.

NetForum employees (not contractors)

Our team in India is our team – these NetForum Enterprise experts are Community Brands employees with years of experience in the association space, working directly with customers just like you.

White-glove treatment to fit your working style

Unsure about working with an India-based Dedicated Team? We know not everyone is comfortable or familiar with off-shored teams, so we give you the white-glove treatment: for the first month* of every Dedicated Team engagement, we provide a US-based NetForum expert - at no extra cost - to support you, interface with your Dedicated Team, and keep things on track. If you like, you can extend or augment your US-based team beyond the first month for an additional fixed fee.

You also don't have to worry about 2am calls — our Dedicated Teams align their working hours to overlap with your morning, giving your organization a true around-the-clock development cycle without impacting your schedule.

"We really appreciate all the hard work and expertise that our Dedicated Team provided. I must admit, at first I was not sure how smoothly this would go but was pleasantly surprised with the ease of the entire process and would sign up to do it again in a heartbeat!"

Ken Graves
Applications Manager, Healthcare Association of New York State
